

LOCATION

ABU DHABI, UAE

Summary Position

of Forward Defense is looking for a skilled and experienced Cyber Threat Intelligence Analyst to lead a new Analysis team. The selected candidate will be responsible for researching, crafting, and conveying analytical products sourced from “on the ground” research into threat actors operating in the cybercrime underground. The successful candidate possesses a solid background tracking cybercrime threat actors and a subject matter expertise of the financially-motivated cybercrime underground economy.

Duties and Responsibilities

- The Lead Cyber Threat Intelligence Analyst will lead and mentor an agile team of intelligence analysts to:
- Identify, research, coordinate, and produce various analytical products centered around financially-motivated cybercrime threat actors observed in underground forums and marketplaces
- Work independently and within the team to identify new and creative opportunities to research and convey valuable analytical products and assessments to clients
- Synchronize analysis and production efforts to satisfy clients’ Priority Intelligence Requirements
- Answer specific Requests for Information (RFI) from clients regarding threats or concerns
- Help design new and innovative processes and programs to build efficiencies and scalability as the company continues to grow

Qualifications, skills, knowledge, or experience

- Subject matter expertise of financially-motivated cybercrime threats and the underground economy ecosystem (e.g. cybercrime forums, marketplaces, enabling services, dump shops, etc.)
- Strong understanding of cybercrime threat actors and their modus operandi
- Proven experience as a team leader, particularly in an intelligence analysis or cyber threat role
- Exposure to the intelligence cycle in a law enforcement, military, security service, cyber threat intelligence team, or similar setting.
- Experience with link-analysis methodologies and tools (e.g. Maltego, Analysts Notebook)
- Good Open Source Intelligence (OSINT) gathering skills
- Excellent written and verbal skills, fluency in English is required
- Highly adaptable working independently and in a team environment
